

Team Work with Marratech Manager Lite

Marratech Manager Lite is a server software solution that enables your team to collaborate and interact over the Internet in real-time. It hosts your meetings and training sessions and makes them available through a simple web-based interface.

How it works

Marratech Manager Lite installs on a server located on your company network, or on the Internet. It is well suited for placement in a co-location facility (aka web hotel).

From its web-based administration tool, you create meeting rooms and manage user accounts. Authorized users join and participate in meetings using the freely available Marratech client software. **No per minute fees, no usage limits.**

Marratech Manager Lite supports a technology called 'MeetNow!' that downloads, upgrades and launches the Marratech software directly in a meeting room from the click of a web link.

Security is omni-present in Marratech Manager Lite as all media are encrypted end-to-end with 256 bit AES encryption.

What it offers

Marratech Manager Lite provides 'virtual' rooms where you and your colleagues can meet. It's available through a perpetual license or quarterly lease supporting a maximum of 5 or 10 concurrent users.

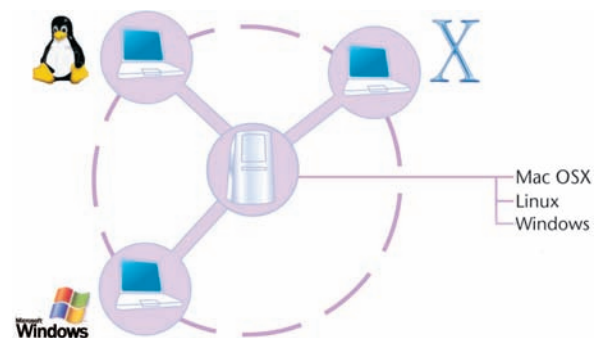

It is meant for smaller teams without the needs for scalable clusters or advanced integration.

Lite but powerful

Marratech Manager Lite is customized for teams of 5 to 10 people offering them a virtual office, training room, customer support center or teleworking capabilities.

While it does not include the more advanced deployment capabilities of the full Marratech Manager version, the Lite version delivers a functional, easy-to-access work environment:

Edition	Manager Lite	Manager
Features		
Max simultaneous users	5 or 10	No limit
Auditoriums	No	Yes
Marratech Client capabilities	full	full
Encryption of all media	Yes. (AES 256 bit and SSL)	Yes. (AES 256 bit and SSL)
SIP and H.323	No	Yes
LDAP and Active Directory	No	Yes
API	No	Yes
Remote Nodes (server cluster)	No	Yes
IP Multicast	No	Yes

Multi-platform - Manager Lite can be deployed on Windows, Mac OS X and Linux and is easy to install and administer on all platforms.

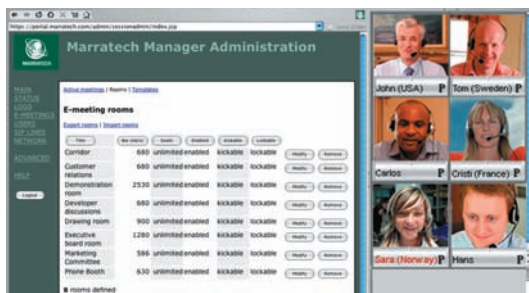

Turnkey - An intuitive installation wizard and meeting room templates make the software easy to install and configure.

Installation can be done in minutes, without the need for external servers, services or expensive consultants.

Once installed, you can customize the appearance and branding of your Manager Lite login page with simple revisions to Cascading Style Sheets and Java Server Pages.

Secure - Marratech meeting encryption is on by default. The server software protects your user IDs and passwords with SSL encryption. The client software protects all of your media (voice, video, whiteboard, and chat) with AES encryption based on 256 bit keys. End-to-end encryption protects your information, even through the server.

From a browser, a web page shows links to virtual meeting rooms configured in the Marratech Manager Lite.

Flexible - The server software is fully configurable. You can easily change bandwidth settings, media selection, encryption, and network port settings. Built-in support for virtual private networks (VPN)

Minimum system requirements for running Marratech Manager Lite

	Windows	Mac OS X	Linux
Processor	Pentium IV, 1.5 GHz	G4 , 1 GHz	Pentium IV, 1.5GHz
